CORVANE PRIVATE CREDIT & GROWTH FUND III

Lending to the UK's best mid-market businesses.

Fund III continues a 14-year strategy of senior and unitranche lending, with selective minority equity, to profitable founder-led companies with EBITDA of GBP 5m-40m across the UK and Ireland.

12-15%

TARGET NET IRR

1.6-1.8x target net multiple

Investors in Fund III can expect a 12-15% net IRR. Our disciplined underwriting has delivered this level of return in every vintage since 2012, through Brexit, Covid and the rate cycle - and our pipeline gives us full confidence it will do so again.

Why private credit, why now

Banks continue to retreat from lending to mid-sized companies, leaving a GBP 30bn+ annual funding gap. Direct lenders can set terms, take security and negotiate strong covenants, with floating-rate loans that adjust as base rates move.

Fund III will build a portfolio of 20-25 loans, typically GBP 10m-35m each, with an equity co-investment sleeve of up to 20% of commitments.

The Corvane approach

Our eight-person investment team has worked together for over a decade and has originated more than 60 transactions. We lead or co-lead every deal, sit on lender committees and maintain close contact with management teams.

Every loan is reviewed by an independent credit committee, and the fund applies exclusions aligned with our responsible investment policy.

CASE STUDY | Halberd Cold Chain Logistics (Fund II)

In 2019 Corvane provided a GBP 28m unitranche facility and a GBP 4m minority equity stake to support the founders' buy-out of a regional temperature-controlled logistics business.

We worked with management to add two new depots and a pharmaceutical contract, more than doubling EBITDA over four years.
